SEALING SOLUTIONS

# 25

The company celebrates this year

# 25 YEARS

providing sealing solutions  
for our customers

**BEST**  
SEALING  
SOLUTIONS

Tecseal exhibits in the main international fairs of the sector.

**FENSTERBAU  
FRONTALE**

Tecseal team is fully committed with the company and willing to provide solutions to our clients, thereby bringing added value to our product.

Customer service is our hallmark and essential key when supplying our products all over the world. Currently, you can obtain our products through our official distributors or alternatively, by contacting us directly through our commercial department.

## OUR TEAM IS FULLY COMMITTED WITH TECSEAL

Tecseal management is highly concerned about quality and customer service. It aims to manufacture a product with the tolerances and packaging required by the client.

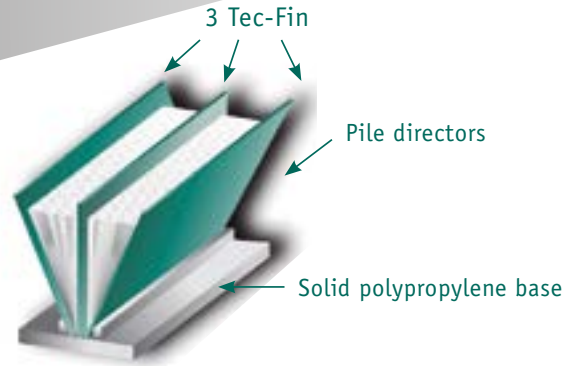

That's why being approved as a company that conforms to the quality standards set by the UNE EN ISO 9001:2008 it's a stamp of success for all the efforts made by our production and quality team.

# Tri-Fin<sup>®</sup>

## Minimizes air and water infiltration

Over 25% improvement in air infiltration compared to a single fin. With our silent fin, it is not appreciated the noise when opening or closing a sliding window or door, improving the air and water leakage by means of laminated fin.

The results are so amazing that most of the customers are deciding to use tri-fin in all of their range of products.

It is known as the first class weatherseal, the ultimate solution for the sliding systems.

BEST SEALING SOLUTIONS  
for sliding systems

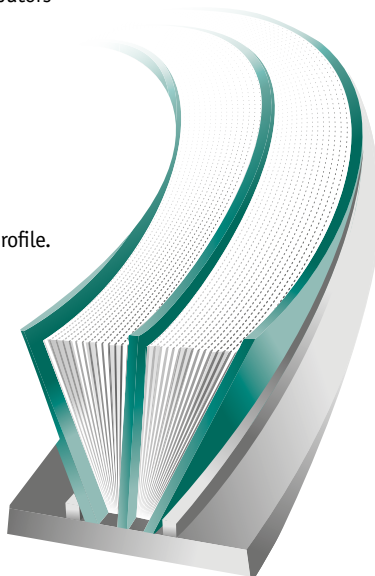

Over 25 years of experience provide us recognition as European manufacturer specialized in the production of weatherstrip seals for all kinds of aluminum, PVC and timber profiles. We began by manufacturing standard woven base, single fin, monofilament and adhesive backing. Some years later, Tecseal embarked on a journey into the world of extrusion, and today we continue developing over 100 new projects every year. In 2004 we enlarged our production with the acquisition of a new technology system, thanks to which Tecseal became the leading manufacturer of sealing solutions.

The company was created in 1992 with the aim of growing worldwide as well as widening the range of products. Official distributors were set up throughout Europe and as we enlarged our portfolio, we began creating new products to meet customers' needs.

Currently we are the exclusive manufacturers of this new technology in Europe. This production system enables us to manufacture an on-line central weatherstrip, which is easy to insert in any kind of profile.

This technology enables us to manufacture the high-performance product called TRIFIN. In a sliding system TRIFIN guarantees class A4 air-tightness based on Classification Regulations: UNE-EN 12207:2000.

**Tecseal provides its products all over the world both through official distributors and directly from the factory**

The top European manufacturers of windows trust Tecseal as their main supplier

Our production is made up of 5 different processes:

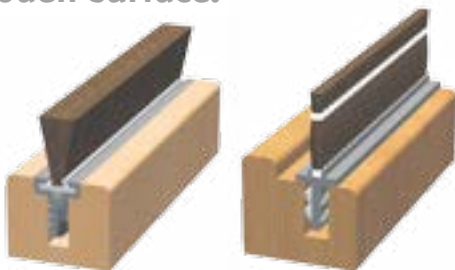

- Woven base
- New Technology
- Special Products
- Timber Joints
- Extruded Pile

## TIMBER JOINTS

PVC and PPE carriers specially designed to fit in timber doors and windows by making a groove in the wooden surface.

### APPLICATIONS

Sliding windows and doors, door bottom seals, wardrobes, kitchen cupboards, swinging door, etc...

**With our products we cover a wide range of sectors**

- Windows, doors and garage doors
- Shutters and mosquito net
- Sunshade
- Furniture
- Automotion

# TECSEAL

## The European Producer of PILE WEATHERSTRIPPING

Tecseal has a storage capacity of 3,000 m<sup>2</sup> for over 10,000 different parts and 30,000,000 lineal meters

Tecseal gets characterized for being a vertical company since it produces with its own machinery BCF yarn using solely premium polypropylene resin.

Our finish products are exclusively made with our BCF yarn.

The woven fabrics represents the 70 % of our total production
